

2010 Plumas-Sierra Solar Program

Plumas-Sierra Rural Electric Cooperative (PSREC) is now offering incentives to encourage the installation of solar photovoltaic (PV) systems in 2010!

California's Senate Bill 1 (SB1, 2006), set a statewide goal to add 3,000 megawatts of new solar PV systems over ten years. The Plumas-Sierra Solar Program (PSSP) is a program designed to encourage PSREC members to install high-quality solar PV systems on their homes and businesses and start producing clean, renewable energy.

Residential members may be eligible for rebates of up to \$6,000!

Please inquire regarding rebates for other rate classes.

To be eligible for an incentive, members must submit a Rebate Application and receive a Rebate Reservation Confirmation letter from PSREC. All rebates will be available on a first-come, first-served basis and will not last!

PSREC is also pleased to offer net-metering for members that install solar PV systems. Please inquire for more information.

In partnership with Cooperative Community Energy, PSREC also offers members:

- Site inspection with system recommendation, design and financial analysis for only \$150!
- Equipment discounts (typically 25-35% off list price!)
- Preparation of local building permit paperwork
- Assistance with tax credits for solar energy – Federal credits have increased!
- Quality assurance and extended warranties
- Membership value – CCenergy is a member-owned Co-op, too!

Please contact PSREC for more information about PSSP eligibility criteria at (800) 555-2207 ext. 6004.
